NAVAKANTH REDDY DUMPA

Lead Data Engineer | PySpark · Azure Data Factory · Delta Lake · Fabric | MCT-Authorised Trainer & Pipeline Specialist

Hyderabad, India | +91 98857 57677 | navkanthr@gmail.com | linkedin.com/in/navakanth-reddy-dumpa | github.com/navakanth1984

PROFESSIONAL SUMMARY

Lead Data Engineer with 14+ years of hands-on technical leadership designing, scaling, and operationalising high-throughput data pipelines on Azure and Microsoft Fabric. Expert in PySpark, SQL, Azure Data Factory (ADF), Azure Databricks, and Delta Lake. Experienced in processing high-velocity telemetry and transaction data, enforcing Medallion data quality standards, and driving pipeline automation through Azure DevOps CI/CD. Authorised Microsoft Certified Trainer (MCT) with deep expertise upskilling engineering teams and delivering robust, zero-downtime production solutions.

Targeted Alignment: Lead Data Engineer — Inspire Brands / Global Brands (Adzuna / Jobs.db)

KEY ACHIEVEMENTS

- **High-Throughput Lakehouse Pipelines:** Built resilient PySpark and ADF ingestion pipelines handling multi-source transactional data into Delta Lake tables, accelerating reporting refresh rates to near-real-time.
- **Data Quality & Medallion Framework:** Implemented automated cleansing, schema drift detection, and deduplication rules across Bronze, Silver, and Gold layers for multi-terabyte workloads.
- **Zero-Downtime Pipeline Deployment:** Led cross-system data engineering release for EDGE platform connecting Azure Databricks, Event Hubs, Key Vault, and SQL MI with 100% uptime.
- **Transpilation & Developer Tooling:** Authored KQLBridge (transpiling KQL queries to Spark SQL and PySpark), drastically reducing migration cycles for analytics engineering teams.
- **Engineering Mentorship:** Trained and mentored 50+ data engineers on best-in-class PySpark patterns, unit testing data pipelines, and Microsoft Fabric delivery practices as an authorised MCT.

CORE COMPETENCIES

- **Data Pipeline & ETL Engineering:** PySpark, Azure Data Factory (ADF), Dataflows Gen2, Azure Databricks, Delta Lake, Event Hubs, Streaming ETL
- **Data Platform & Fabric:** Microsoft Fabric (OneLake, Lakehouse, Warehouse), Azure Synapse Analytics, SQL Managed Instance, Power BI
- **Data Modeling & Performance:** Medallion Architecture (Bronze/Silver/Gold), Star Schema, Delta Parquet compaction, Partition pruning, Indexing
- **Languages & Automation:** Python, PySpark, T-SQL, KQL, Shell Scripting, Azure DevOps CI/CD, Git
- **Certifications & Leadership:** MCT (Microsoft Certified Trainer), DP-700 Fabric Data Engineer, DP-600 Fabric Analytics Engineer, DP-900 Azure Data

PROFESSIONAL EXPERIENCE

Lead Consultant — Data Engineer & BI Architect — Genpact India Pvt Ltd, Hyderabad (Dec 2019 – Present)

- Designed and delivered Microsoft Fabric and Azure Data platforms aligned to client business goals — including OneLake-based Lakehouse architectures, Data Warehouse layers, and governed Dataflow Gen2 ingestion pipelines built on Medallion Architecture across multi-terabyte CPG and HR workloads.
- Led client-facing technical discovery sessions, architecture whiteboard workshops, and design reviews — translating ambiguous business requirements into detailed, documented architecture blueprints and solution design specifications.
- Defined and enforced enterprise best practices for governance, Row-Level Security (RLS), data lineage tracking, deployment pipeline standards, and cost optimisation across all Fabric, Azure, and Power BI environments.
- Designed and delivered scalable Power BI semantic models with advanced DAX measures, composite models, and DirectQuery configurations — enabling near-real-time analytics for 140+ business users across global client locations.
- Developed reusable architecture patterns, pipeline templates, and deployment standards that were adopted across multiple client engagements, significantly reducing onboarding and delivery time for new distributor data feeds.
- Mentored and upskilled 50+ data engineers and analytics professionals as an MCT-authorised trainer for DP-700, DP-600, and DP-900 — building engineering bench strength on Microsoft Fabric delivery approaches.
- Led and managed CI/CD release pipelines via Azure DevOps and Git, ensuring zero-downtime promotion of Fabric and Power BI assets from development through UAT to production environments.
- Pioneered the first cross-tenant enterprise go-live of the EDGE OCR platform, integrating Azure Databricks, Event Hubs, SQL Managed Instance, Key Vault, and Power BI Service — demonstrating full-stack Fabric and Azure architecture delivery.

VBA Developer — Genpact India Pvt Ltd, Hyderabad (Jun 2018 – Nov 2019)

- Developed and maintained advanced Excel-VBA and Access-VBA automation solutions for financial reconciliation and operational reporting, eliminating ~40 hours/week of manual effort across multi-team workflows.
- Engineered automated data extract, transform, and load (ETL) routines connecting SQL Server databases with reporting front-ends, ensuring accurate reconciliation and auditable financial logs.

Operations Lead / Senior Data Specialist — Genuity Technologies, Hyderabad (Feb 2011 – May 2018)

- Led data processing and reporting operations, architecting SQL Server database queries, stored procedures, and operational dashboards tracking key delivery metrics across multiple service lines.
- Orchestrated cross-functional operational teams, establishing data quality auditing frameworks and workflow automation that achieved a 99.2% on-time reporting SLA.

EDUCATION & CERTIFICATIONS

- Bachelor of Science (B.Sc.) in Computer Science — Osmania University, Hyderabad
- Microsoft Certified Trainer (MCT) — Active Authorised Trainer
- Microsoft Certified: Fabric Data Engineer Associate (DP-700)
- Microsoft Certified: Fabric Analytics Engineer Associate (DP-600)
- Microsoft Certified: Azure Data Fundamentals (DP-900)
