NAVAKANTH REDDY DUMPA

Microsoft Fabric Architect | OneLake · Lakehouse · Data Factory · Power BI | MCT-Authorised Trainer & Enterprise Analytics Consultant

Hyderabad, India • +91 98857 57677 • navkanthr@gmail.com • linkedin.com/in/navakanth-reddy-dumpa • github.com/navakanth1984 • nthdimensionacademy.com

PROFESSIONAL SUMMARY

Microsoft Fabric Architect & Enterprise Analytics Consultant with 14+ years of experience designing, building, and optimising modern data and analytics platforms for enterprise clients across CPG, Financial Services, and HR domains. DP-700 (Fabric Data Engineer) and DP-600 (Fabric Analytics Engineer) certified, with deep hands-on expertise across all Microsoft Fabric services — OneLake, Lakehouses, Warehouses, Dataflows Gen2, Data Factory, and Power BI. Authorised Microsoft Certified Trainer (MCT) for DP-700, DP-600, and DP-900, with a proven record mentoring 50+ engineers on Fabric delivery approaches. Experienced in leading technical discovery sessions, architecture workshops, and stakeholder consultations — translating business requirements into practical, scalable, secure and governed data platform solutions.

KEY ACHIEVEMENTS

★ **Enterprise Fabric Lakehouse Architecture:** Designed and delivered a Microsoft Fabric Lakehouse platform using Medallion Architecture (Bronze → Silver → Gold) for a global CPG client — consolidating multi-source telemetry into a single governed source of truth with OneLake, cutting reporting latency from 7 days to near-real-time.

★ **Security & Governance Blueprint:** Defined enterprise-wide governance, RLS, metadata lineage, and deployment standards across Fabric/Power BI environments — establishing reusable patterns now used across multiple client engagements.

★ **MCT-Authorised Fabric Training Delivery:** Designed and delivered DP-700, DP-600, and DP-900 training programmes as an authorised Microsoft Certified Trainer — mentoring and upskilling 50+ engineers on Fabric delivery approaches.

★ **Zero-Downtime Production Go-Live:** First in the organisation to architect and lead a cross-tenant enterprise deployment integrating Databricks, Event Hubs, SQL Managed Instance, Key Vault, and Power BI — with zero production downtime.

★ **Open-Source Architecture Tooling:** Authored KQLBridge (KQL-to-Spark SQL / T-SQL / PySpark transpiler) and ClawGlove (governance layer for OpenClaw), demonstrating depth in reusable pattern development and platform architecture.

CORE COMPETENCIES

■ Microsoft Fabric Architecture (OneLake · Lakehouse · Warehouse)

■ Power BI Semantic Models · DAX · DirectQuery · Deployment Pipelines

■ Data Factory Pipelines · Dataflows Gen2 · Integration Runtimes

■ Data Governance · RLS · Security · Azure Purview · Metadata Lineage

■ Client Consulting · Workshops · Technical Discovery Sessions

■ Stakeholder Engagement · Architecture Roadmapping · Technical Delivery

■ Reusable Architecture Patterns & Delivery Standards

■ Team Mentoring · Fabric Training (MCT) · Code Reviews

■ Star Schema · Medallion Architecture · ETL/ELT Design Patterns

■ CI/CD · Azure DevOps · Git · Agile Delivery Frameworks

■ Azure Synapse Analytics · ADLS Gen2 · Azure Databricks · Spark SQL

■ Cost Optimisation · Performance Tuning · Scalable Platform Design

PROFESSIONAL EXPERIENCE

Lead Consultant — Data Engineer & BI Architect

Dec 2019 – Present

Genpact India Pvt Ltd, Hyderabad

- Designed Microsoft Fabric architectures aligned to client business goals — including OneLake-based Lakehouse platforms, Data Warehouse layers, and governed Dataflow Gen2 ingestion pipelines built on Medallion Architecture (Bronze → Silver → Gold) across multi-terabyte CPG and HR workloads.
- Led client-facing technical discovery sessions, architecture whiteboard workshops, and design reviews — translating ambiguous business requirements into detailed, documented architecture blueprints and solution design specifications.
- Defined and enforced enterprise best practices for governance, Row-Level Security (RLS), data lineage tracking, deployment pipeline standards, and cost optimisation across all Fabric and Power BI environments.
- Designed and delivered scalable Power BI semantic models with advanced DAX measures, composite models, and DirectQuery configurations — enabling near-real-time analytics for 140+ business users across global client locations.
- Developed reusable architecture patterns, pipeline templates, and deployment standards that were adopted across multiple client engagements, significantly reducing onboarding and delivery time for new distributor data feeds.
- Mentored and upskilled 50+ data engineers and analytics professionals as an MCT-authorised trainer for DP-700, DP-600, and DP-900 — building engineering bench strength on Microsoft Fabric delivery approaches.
- Led and managed CI/CD release pipelines via Azure DevOps and Git, ensuring zero-downtime promotion of Fabric and Power BI assets from development through UAT to production environments.
- Pioneered the first cross-tenant enterprise go-live of the EDGE OCR platform, integrating Azure Databricks, Event Hubs, SQL Managed Instance, Key Vault, and Power BI Service — demonstrating full-stack Fabric and Azure architecture delivery.

VBA Developer **Jun 2018 – Nov 2019**

Deloitte (via Magna Infotech), Hyderabad

- Delivered client-facing automated analytics and reporting systems integrating SQL Server and Excel workbooks into governed dashboards for finance and HR stakeholders.
- Engineered Python and Power Query (M) automation frameworks, freeing analyst capacity from manual data preparation and improving consistency of client-facing reporting outputs.

Data Analyst — BI & Reporting **Jan 2015 – Apr 2017**

IBM (via Alchemy Techsol), Hyderabad

- Partnered with Sales Management Advisors to design Cognos-based reporting templates and SQL-driven financial models, reducing ad-hoc requests and improving self-service analytics adoption.
- Prepared architecture process maps and technical documentation to support client requirement analysis and cross-team alignment sessions.

Data Analyst — QA & Testing **Dec 2009 – Oct 2011**

Wells Fargo (via Magna Infotech), Hyderabad

- Designed and validated test datasets for core banking applications during the Wells Fargo/Wachovia integration, ensuring data quality and accuracy across critical financial datasets.
- Built automated validation tools that shortened QA cycle time and strengthened data governance compliance.

TECHNICAL SKILLS

- **Microsoft Fabric:** OneLake · Lakehouse · Data Warehouse · Dataflows Gen2 · Data Factory · Real-Time Intelligence · Deployment Pipelines · Medallion Architecture
- **Power BI:** Desktop · Service · Semantic Models · DAX (Advanced) · DirectQuery · Composite Models · Row-Level Security (RLS) · Deployment Pipelines
- **Azure Ecosystem:** Azure Synapse Analytics · ADLS Gen2 · Azure Data Factory · Azure Databricks · Event Hubs · Key Vault · SQL Managed Instance · Azure Purview · Azure DevOps
- **Languages & Query:** SQL · Python · DAX · Power Query (M) · KQL · Spark SQL · VBA
- **Data Architecture:** Star Schema · Slowly Changing Dimensions · ETL/ELT · Medallion Architecture · Delta Lake · Performance Tuning · Partitioning
- **Governance & Security:** Data Governance · Metadata Lineage · RLS · Compliance · Azure Purview · Unity Catalog · Cost Optimisation Frameworks
- **DevOps & Consulting:** Git · Azure DevOps · CI/CD · Agile/Scrum · Architecture Reviews · Workshops · Stakeholder Management
- **AI & Open Source:** GitHub Copilot · Claude · Gemini · KQLBridge (author) · ClawGlove (author)

CERTIFICATIONS

✓ DP-700 — Microsoft Certified: Fabric Data Engineer Associate
✓ DP-600 — Microsoft Certified: Fabric Analytics Engineer Associate
✓ MCT — Microsoft Certified Trainer — DP-700, DP-600, DP-900
✓ DA-100 — Power BI Data Analyst Associate
✓ DP-900 — Azure Data Fundamentals
✓ MOS — Microsoft Office Specialist

EDUCATION & OPEN-SOURCE CONTRIBUTIONS

- PGDBA (MBA Equivalent) — Symbiosis Centre for Distance Learning | 2012
- B.Com — Prof. G. Ram Reddy Centre for Distance Education | 2007

✓ KQLBridge — Open-source KQL-to-Spark SQL / T-SQL / PySpark transpiler — reusable accelerator demonstrating cross-engine query translation (github.com/navakanth1984/kqlbridge)
✓ ClawGlove — Enterprise governance system and policy layer for the OpenClaw AI framework — demonstrates reusable governance pattern development
